

## Youth Aviation Camp \$99

As a kid, who hasn't dreamed of flying? Airwork Las Vegas is offering a youth aviation camp for kids, age 10 and up. This camp gives your kid a real life look into the world of aviation with a "hands-on" experience taking place in an actual airport environment. Your child will learn about:

- History of Aviation
- How to become a pilot
- Airplanes, Helicopters, Hot Air Balloons and Gliders
- Flight Controls
- Aerodynamics
- Weather
- Navigation and Flight Planning

This will peak your child's interest with engaging activities including an actual preflight of a real airplane and helicopter. They will get a chance to sit in the cockpit to get a feel for what it's like to be a pilot. Each participant will receive a simple, take-home ground school course to get started on the path to becoming an aviator.
